David—I know you are out next week. I wanted to do this discussion this week but Karl is out all week and he needs to be there as well. But no bother, we will have more of these meetings no doubt.

In the meantime, do you think you could supplement the attached slides by adding in a slide that calculates what the specific triggers are for total and advanced in 2015 and 2016, and might as well do 2017, too? That is, what volumes (standards) would represent a 20% reduction?

Give me a call or email me if that's unclear. Thanks

Ben
